Career Objective

As a current university student pursuing a degree in Information Technology, my objective is to launch my career in the industry and gain hands-on experience in Software Development. I am eager to learn and develop my skills in a supportive and dynamic environment, and I am committed to staying up-to-date with the latest technologies and trends. With a strong work ethic and a positive attitude, I am ready to take on new challenges and make a valuable contribution to your team.

Core Competencies

HTML, CSS	JavaScript (ReactJS)	Java
Git/GitHub	MySQL, SQL Server	IoT
Basic OOP	Basic Data Structure	C/C++
Resilient work-ethic	Self-learning	English

Education

International University – VNU HCMC	2020 – <i>Present</i>
Engineering degree in Information Technology	
GPA: 3.37/4	

Courses and Certifications

IELTS Academic	Band 6.5
May 2021	
28Tech	Front-End Developer
February 2023 – Present	
Codecademy	Java for Programmers Course
March 2023	
Cisco	CCNA: Introduction to Networks
Dec 2022	
Cisco	CCNA: Switching, Routing, and Wireless Essentials
Jan 2023	

Experiences

AIoT HCMIU Research Group	November 2022 – <i>Present</i>
<i>Member</i>	

- Collaborating with fellow group members to explore the latest developments in IoT and deep learning, and applying these technologies to gain hands-on experience in real-world problems.
- Conducting research on license plate recognition using deep learning models, including convolutional neural networks and recurrent neural networks.
- Presenting research findings and project progress to the faculty advisors, and receiving feedback on how to improve and refine our work.

Projects

FLAPPY BIRD

February 2021 – June 2021

Member

Description	This is a Java game project which was created by my team for OOP Course
No. members	4
Position	Back-end Developer
Responsibilities	<ul style="list-style-type: none">• Build back-end (handling pipe class, game element layer)• UML Diagram
Technology in use	Java
Link	https://github.com/WangTris/OOP_Project_flappyBird

TETRIS

March 2023 – July 2023

Member

Description	This is a Tetris game (a childhood game everyone plays created by my team)
No. members	5
Position	Developer
Responsibilities	<ul style="list-style-type: none">• Build front-end• Build back-end
Technology in use	<ul style="list-style-type: none">• Front-end: HTML, CSS• Back-end: JavaScript
Link	<ul style="list-style-type: none">• https://github.com/WangTris/Tetris-Game

HOSPITAL MANAGEMENT SYSTEM

March 2023 – June 2023

Member

Description	Website to manage Hospital System
No. members	5
Position	Developer
Responsibilities	<ul style="list-style-type: none">• Build front-end• Build back-end
Technology in use	<ul style="list-style-type: none">• Front-end: HTML, CSS• Back-end: PHP, MySQL
